FASKER new: 64 levels, bonus, screen freeze! You can follow me on twitter @AmateurCompo AmateurCompo.fi is a compo hosting a full list of games in a single wiki page. The site has a very simple layout, each game page is a single page with a list of details and some screenshots, under the screen shots you will find a link to the game files. New games are added daily and you can vote on them. The main page is very simple and non-intrusive, it just has the current submission list. The site doesn't have a great deal of popularity, but if you are looking for something different, or just want to find something new, you might like it. It's worth a try, but I wouldn't go out of my way to visit the site.
